Masuma Oil Filters are manufactured to exacting OEM filter factory specifications. The filter element is a folded paper block with a high packing density. The design of the filter includes two important valves: anti-drain (reverse), which protects the motor from oil starvation at start-up, and bypass (bypass), which provides oil directly if it is impossible to pump it through the filter. Masuma oil filters provide complete oil cleaning from solid particles, sludge and wear products that are dangerous for rubbing engine parts. Masuma is a global brand of auto parts, components and consumables. The main specialization of the brand: resource parts for post-warranty service of Japanese cars. The company's strategy is to offer consumers the best ratio of reliability and cost of spare parts. All products are manufactured to order, technology and under the control of the parent company Masuma Auto Spare Parts Co., LTD (Tokyo, Japan) at dozens of modern factories located in East Asia.

# The dangers of not changing the filter in time!!

Engine work requires the lubrication of oil. If the impurities in the oil are not filtered into the cylinder, the aging of the piston group and the cylinder will be accelerated.

Cylinder fray

Petrol blocked

Burn oil cylinder

Reduced engine power

Increased fuel consumption

Make noise

# DO YOU NEED SUCH A FILTER ?

Slow wear

Protect the

Reduce fuel  
consumption

The function of the oil filter is to filter impurities, so it should be replaced at the same time as the oil. If it is not replaced in time, the oil will not be effectively filtered, which will lead to accelerated wear of the internal parts of the engine due to impurities in the oil.

## WORKING PRINCIPLE :

Filter impurities, dirt, etc. in the oil, provide reliable lubricating oil for the engine, reduce wear, reduce wear and prolong engine life.

# Oil filter

## Product Structure :

- The shell uses 0.5MM electrolytic plate, which is durable and not easy to be damaged.
- Bypass valve and check valve design to ensure continuous supply of oil.
- Adhesive-filled double lock seam can withstand pressures up to 300 p.s.i
- Multi-directional sealing ring ensures that the oil seal does not leak and can be quickly disassembled.

## Use high-quality cellulose filter paper.

Long-term guarantee of oil clean

## Bypass valve device design, keep the maintain oil supply stability.

### Bypass valve :

It is ensured that the oil in many cases is supplied to the bypass valve in the following cases, so as to ensure that a sufficient amount of oil reaches the surface of the engine parts to reduce friction.

- Oil is viscous in cold start or low temperature conditions.
- Exceeds the replacement cycle and the filter element is severely blocked.

### Check valve :

Prevents lubrication when the engine is shut down again the oil in the system is emptied to ensure that when the engine starts quickly supply oil when moving.
