Masuma levers and rods are important supporting elements of the suspension, therefore they are made only from reliable materials. Masuma levers are made of Mn65 carbon tool steel and Cr40 and Cr20 structural alloy steels - the same as those used in the original levers of Japanese cars. Arm bushing protectors are manufactured from Japanese Chloroprene Rubber, the most effective material for long-term durability of these parts. Levers and rods are guaranteed for 12 months. Wherever you bought or installed a part, within a year you have the right to return it by simply providing him with a receipt or other document confirming the purchase date and price. Even if you are not a certified auto mechanic and installed the part yourself in your garage, just keep your purchase receipt and, if a problem arises, you can always return the part. Masuma is a global brand of auto parts, components and consumables. The main specialization of the brand: resource parts for post-warranty service of Japanese cars. The company's strategy is to offer consumers the best ratio of reliability and cost of spare parts.

## MASUMA HIGH QUALITY COLD ROLLED PLATE (SCHEMATIC DIAGRAM)

- ❖ The rear support bar series products adopt the international standard automobile special steel plate to be pressed and formed in one time, which has high tensile strength that improves the structural strength of the car body.
- ❖ The welding of tie rod and bushing shell adopts automatic robot protective welding technology, which guarantees the welding strength and consistency of the product.
- ❖ The rubber sleeve adopts Malaysian natural rubber, which can make the rubber material denser and prolong the life of the product through injection and neck shrinking process
