

P2048 MASUMA Automotive Rear Axle Shock Absorber For Subaru Outback 340027 20365AJ02B

Our Product Introduction

for more products please visit us on masumajp.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: MASUMA
- Minimum Order Quantity: 2 pieces
- Price: Negotiation

Product Specification

- Purpose: For Replace/repair
- Year: 2009-2014, 1997-2012, 1992-2000, 2006-2014, 2020-, 2012-, 2013-, 2015-2019, 2019-
- Model: FORESTER(JF1,2), VIVIO, WRX/LEVORG, TRIBECA, Exiga, Evoltis, FORESTER(MMR), FORESTER(PLP), Forester
- OE NO.: 20365AJ02A, 20365AJ02B, 20365SC072, 340027
- Car Fitment: Subaru
- Warranty: 12 Months
- Car Model: For Subaru Outback
- Condition: New
- Product Name: Rear Axle Shock Absorber
- MASUMA NO.: P2048
- Type: Twin-tube Gas-filled Shock Absorber
- Article Composition: 1 Shock Absorber

Product Description

Product Description

MASUMA No.	P2048
Part Name	Rear Axle Shock Absorber
OEM No.	20365AJ02A,20365AJ02B,20365SC072,340027,20365AJ02A,20365AJ02B
For KYB No.	340027
Type	Twin-tube gas-filled shock absorber
Suitable for	
Subaru Outback 2010-2012	

**Shock absorber
(structure chart)**

**Piston valve assembly
(Schematic diagram)**

**Bottom valve assembly
(Schematic diagram)**

It can restrain the vibration of spring and absorb the energy of road bump influence. It not only affects the riding comfort, but also affects the driving safety, and may cause the damage of other parts if the shock absorber is broken.

The shock absorber is a part need to replace regularly and it's service life is around 80000km. Even if the shock absorber is not broken, it should be replaced, because the internal part of shock absorber has been worn and tear. It is impossible to judge whether the shock absorber is damaged from the product appearance. To avoid traffic safety issues, replace the shock absorber in time is necessary, and the shock absorbers need to be replaced in pairs to ensure the balance of the vehicle handling and the best braking performance.

How to check if the shock absorber needs to be replaced?

1. Park the car on a flat road, press both sides manually or press the bumper hard with the boot lid open (or press front part of the car), then release hands. If the vehicle stops after rebounds in 2-3 seconds, shock absorber is regarded as to be replacement needed.
2. When suddenly brake the car at low speed, the car shakes violently, and the human body feels uncomfortable, shock absorber is highly probably broken.
3. The car stops after driving about 10km on the road with poor conditions, if you don't feel any temperature even cold by hand touch the housing of shock absorber that is to say, shock absorber is not working normal due to no resistance internal itself.

SHOCK ABSORBER?

What advantage

1. No noise
2. No oil leakage
3. Durable and easy to control
4. More comfortable and stable

Stable Driving

No Oil Leaking

Anti-shaking

Noise Free

High
Temperature
Endurance

Long Lasting

SHOCK ABSORBER

Are you worried about the quality ?

Abnormal Noise?

oil Leaking?

Turning Bend?

Shock Absorber (structure chart)

Less Noise And More Comfortable !!

Quiet design only for your comfortable experience

Comfortable
driving

Increase braking
distance

Improve stability
and security

Reinstall in Situ Fit Perfectly

Product Details

HARDWARE METAL

High-strength piston rod, strong and wear-resistant

BRAND CODE

MASUMA product code identification

INSTALLATION

It can be replaced directly without any change
