Masuma crosspieces are available for driveshafts and steering shafts. The strength of the crosspiece directly depends on its heat treatment. According to the Masuma technology, all crosses are hardened in a thermal furnace for 36–40 hours, which largely ensures their high quality. Also, mandatory control of hardness and geometry of each batch, metallographic control and mechanical tests are carried out. Most of the crosses are equipped with a grease fitting that allows you to periodically service (lubricate) the moving part of the cross, which significantly increases its resource. The guarantee for the crosspieces is 12 months. Wherever you bought or installed a part, within a year you have the right to return it by simply providing him with a receipt or other document confirming the purchase date and price. Even if you are not a certified auto mechanic and installed the part yourself in your garage, just keep your purchase receipt and, if a problem arises, you can always return the part.

Masuma is a global brand of auto parts, components and consumables. The main specialization of the brand: resource parts for post-warranty service of Japanese cars. The company's strategy is to offer consumers the best ratio of reliability and cost of spare parts.
