Masuma transmission filters provide high-quality cleaning of transmission fluid from metal wear products. Two types of material are used for filtration: metal mesh and felt membrane. The metal mesh is a coarse oil filter that retains large impurities. The felt layer, due to its fine-pored structure, effectively retains iron chips and dust that form as a result of wear of parts. Together with thorough cleaning, the filter media provide the required transmission fluid throughput. Complete set: All Masuma transmission filters are completed with gaskets for the oil pan (crankcase) of the engine, except for filters where the crankcase is sealed with a sealant. The warranty for Masuma transmission filters is 12 months. Masuma is a global brand of auto parts, components and consumables. The main specialization of the brand: resource parts for post-warranty service of Japanese cars. The company's strategy is to offer consumers the best ratio of reliability and cost of spare parts. All products are manufactured to order, technology and under the control of the parent company Masuma Auto Spare Parts Co., LTD (Tokyo, Japan) at dozens of modern factories located in East Asia.
