For effective operation of the wiper blades during the winter period of operation, Masuma provides special winter wipers for motorists. The sturdy metal frame is protected by a sealed and resilient rubber boot. It allows you to keep all parts of the frame mobile and prevent snow and ice from sticking to the frame, thereby preserving the functionality of the product. Regardless of weather conditions, a tight fit of the working element to the glass will be achieved. The rubber bands of the Masuma winter wiper blades of the Optimum series are injection-molded, which allows you to obtain a clear rectangular working edge without rounding and burrs. Silent efficient cleaning at any vehicle speed. The material is not afraid of sunlight, does not lose elasticity at low temperatures and is not susceptible to icing. The kit contains 7 fasteners for all the most popular cars in the world. The resource of the rubber working element is up to 1,000,000 work cycles. Masuma is a global brand of auto parts, components and consumables. The main specialization of the brand: resource parts for post-warranty service of Japanese cars. The company's strategy is to offer consumers the best ratio of reliability and cost of spare parts. All products are manufactured to order, technology and under the control of the parent company Masuma Auto Spare Parts Co., LTD (Tokyo, Japan) at dozens of modern factories located in East Asia.
