For effective operation of the wiper blades during the winter period of operation, Masuma provides special winter wipers for motorists. The sturdy metal frame is protected by a sealed and resilient rubber boot. It allows you to keep all parts of the frame mobile and prevent snow and ice from sticking to the frame, thereby preserving the functionality of the product. Regardless of weather conditions, a tight fit of the working element to the glass will be achieved. A distinctive feature of the Nano Graphite line is the increased service life of the working element up to 1,500,000 work cycles. The improved rubber composition allows these wipers to operate even at very low temperatures, including in regions where -30°C , the usual temperature in winter. Elastic blade with high graphite content. Masuma is a global brand of auto parts, components and consumables. The main specialization of the brand: resource parts for post-warranty service of Japanese cars. The company's strategy is to offer consumers the best ratio of reliability and cost of spare parts. All products are manufactured to order, technology and under the control of the parent company Masuma Auto Spare Parts Co., LTD (Tokyo, Japan) at dozens of modern factories located in East Asia.
