Frame wiper blades are the most common type of wiper blade. Despite the simplicity of the design, they have good cleaning properties. The skeleton of a traditional brush contains movable rocker arms. Thanks to which the rubber band fits snugly to the windshield. The metal frame, treated with an anti-corrosion coating, is not afraid of the effects of the external environment and is distinguished by its durability. The rubber bands of the frame wiper blades of the Masuma Optimum series are made by injection molding, which allows to obtain a clear rectangular working edge without rounding and burrs. Silent efficient cleaning at any vehicle speed. The kit contains 2 fasteners for the most popular cars in the world. The resource of the rubber working element is up to 1,000,000 work cycles. Masuma is a global brand of auto parts, components and consumables. The main specialization of the brand: resource parts for post-warranty service of Japanese cars. The company's strategy is to offer consumers the best ratio of reliability and cost of spare parts. All products are manufactured to order, technology and under the control of the parent company Masuma Auto Spare Parts Co., LTD (Tokyo, Japan) at dozens of modern factories located in East Asia.
